SUBJECT INDEX

A
Abies marocana, wood terpenoids from 1271
Acacia melanoxylon, protein kinase inhibition by catechins from 1399
Acampae praemorsa, revised structure of flavidinin from 273
Acanthaceae 1259
ACC oxidase activity, in sunflower seedling roots, influence of CO_2 on 847
Acetogenin, from *Annona* 1325
Acetophenone, as phytoalexin from *Sanguisorba* roots 331
Acetophenone biotransformation, by immobilized cells of carrot, tobacco and *Gardenia* 661
Acetyl groups, bound to cell walls, ^{1}H NMR determination of 959
Acetylenic acid, from *Minquartia* 1297
Achillea millefolium, amino acid accumulation in cell cultures of 629
Acid phosphatase, from *Neurospora*, constitutive excretion of 1131
Acnistus breviflorus, biosynthesis of withanolides in 927
Aconitum kongboense, C_{19}-diterpenoid alkaloids from 829
Actinidia polygama, triterpenoids from callus tissue of 377
Actinidiaceae 377
Agaricus bisporus,
  low-isoelectric point tyrosinase isoforms from 573
  melanin formation in 597
Agrobacterium rhizogenes, alkaloid synthesis by *Rauwolfia* root cultures transformed by 381
Ajmalicine metabolism, in *Catharathus* cell cultures 677
Alangiaceae 1331
Alangium premnifolium, ionol glycosides from 1331
Alanines, β-substituted, non-protein, enzymic synthesis of 1089
Algae 55, 59, 155, 349, 693, 697, 1177, 1233, 1387
Alkaloid synthesis, by *Rauwolfia* transformed root cultures 381
Alkaloids,
  aporphine, from *Lindera* 1363
  canthin-6-one, from *Eurycoma* 799
  carbazole, from *Murraya* 1085
  cyclopeptide, from *Ziziphus* 1579
  diterpenoid, from *Aconitum* 829
  from *Brunsvigia* 809
  from *Dysoxylum* 1361
  from *Haplophyllum* 1600
  from *Newbouldia* roots 1602
  hasubanan, from *Stephania* 263
  indole,
    biotransformation capacity of *Tabernaemontana* cultures for 671
    from *Alstonia* leaves 249, 253
    from *Leuconotis* 169
    from *Strychnos* root bark 533
  isoquinoline, influence of precursors on production of, in *Cephaelis* 947
  naphthylisoquinoline,
    antiplasmodial, from *Triphyophyllum* and *Ancistrocladus* 1461
    from *Ancistrocladus* 259
  piperidine, from *Picea* and *Pinus* 951
  purine, distribution of, in *Herrania* and *Theobroma* 1237
  pyrazole, from *Newbouldia* 1053
  pyrrolizidine, from *Chromolaena* 615
  quinolizidine, from *Genista* 421
  sesquiterpene pyridine, from *Maytenus* 803
  steroidal, from *Lycopersicon* 813
  tropane,
    biosynthesis of,
      by *Anabaena* 1195
      in *Datura* 935
    in *Hyoscyamus* 107
Alkenones, from *Isochrysis* 1233
Alkyl esters, isomeric, in *Quercus* leaf cuticular wax 79
Alkylresorcinols, from *Ononis* 493
Aloe, anthraquinones and isoeleutherol from roots of 401
Aloeaceae 401, 1163
A. hildebrandtii, dihydroisocoumarin glucoside from 1163
Alstonia macrophylla, indole alkaloids from leaves of 249, 253
Alternaria alternata,
  dibenzo-α-pyrones from 665
  metabolism of host-specific phytotoxin produced by 101
A. porri, phytotoxin from 603
Amaryllidaceae 809
Amino acid
  accumulation, in *Achillea* cell cultures 629
  amides, from *Hemerocallis* 1057
Amino acids, non-protein, enzymic synthesis of 1089
Anabaena flos-aquae, anatoxin-*a* biosynthesis by 1195
Anacardiaceae 1301
Anatoxin-*a*, biosynthesis of, by *Anabaena* 1195
Ancistrocladaceae 259, 1461
Ancistrocladus, antiplasmodial naphthylisoquinoline alkaloids from 1461
A. heyneanus, naphthylisoquinoline alkaloid from 259
Annona reticulata, acetogenin from 1325
Annonaceae 1325
Anodendron affine, cardenolide from 1077
Anthocyanidins, from *Ricciocarpos* cell walls 233
Anthocyanin biosynthesis, in *Dendranthema* cultivars 145
Anthocyanins,
  acylated, from *Pharbitis* flowers 407
  from *Aralia* cell cultures 1471
  malonylated, from purple sunflower seeds 237
  metallo-, from blue *Salvia* flowers 1167
  resonance Raman spectroscopy of 227
Anthraquinones,
  from *Aloe* roots 401
  from *Bulbine* bulbs 685
  from *Senna* 465
Anti-complementary neutral polysaccharides, from *Artemisia* 73
Anti-insect activity, of dihydroisocoumarin glucoside from *Aloe* 1163
Antioxidant system, in *Sporobolus* 561
Antiplasmodial naphthylisoquinoline alkaloids, from *Triphyophyllum* and *Ancistrocladus* 1461
Antiviral diterpenes, from *Salvia* 539

Aphid infestation,
correlation of levels of, with metabolic changes in barley 317
effect of, on enzyme activities in wheat and barley 313
of scots pine, effect of ozone on 39
Aphid resistance, of barley hybrid, non-correlation of, to glutamic acid content 601
Apium graveolens, sterol composition of cell cultures of 655
Apocynaceae 169, 249, 253, 353, 381, 655, 671, 677, 1077, 1183, 1485
Araceae 321, 777
Aralia cordata, anthocyanin from cultured cells of 1471
A. elata, oleanolic acid saponins from 1319
Araliaceae 963, 987, 1221, 1255, 1319, 1471
Aristolochiaceae 969
Artemisia princeps, anti-complementary neutral polysaccharides from leaves of 73
Artocarpus heterophyllus,
flavonoids and long-chain fatty ester from 781
triterpenoids from 1001
Arum italicum, neolignans from 777
Arundina bambusifolia, stilbenoids from 205
Asafetida, sesquiterpene coumarin ethers from 183
Asclepiadaceae 1545, 1549
Asiasarum sieboldi, enantioexcess monoterpenes from roots of 969
Aspalathus linearis, phenolics from 1559
Aspergillus flavus, producing mycotoxin associated with turkey 'X' disease 817
A. niger, biotransformation of neo- and isomenthols by 1465
A. niger, (+)-epimagnolin biotransformation by 1191
A. saitoi, modification of 1,2-α-D-mannosidase from, by water-soluble carbodiimide 267
Asphodelaceae 685
Aster tataricus, terpenoid glycosides from roots of 173
Astragalus alexandrinus, cycloartane triterpene glycosides from 745
Astrotrichilia asterotricha, dammaranes from 542
Atropa belladonna, tropinone reduction in rootcultures of 1441
Auxin-binding protein 1, from maize, modelling the auxin-binding site of 1111

B

Baccharis genistelloids, *neo*-clerodane diterpenoids from 443
B. linearis, phenylpropanoids from 1037
Bacillariophyceae, essential polyunsaturated fatty acids from 155
Bacteria 343, 365, 381, 1195
Barringtonia acutangula, saponins from 1315
Benzisochromanquinones, from *Ventilago* 1029
Benzochromone, from *Sophora* roots 785
Benzoxazinone, from *Secale* 827
Berberine bridge enzyme, heterologous expression of, in insect cell culture 353
Bibenzyl synthase, catalysing orchid phytoalexin biosynthesis 63
Bicoumarins, from *Petromyces* ascostromata 1049
Biflavonoids,
from *Hypnum* 795
from *Ochna* 791
from *Pentagramma* farinose exudate 1043
Bignoniaceae 1053, 1187, 1602
Biologically active
acetophenone, phytoalexin, from *Sanguisorba* 331
alkaloids, antiplasmodial, from *Triphyophyllum* and *Ancistrocladus* 1461
dihydroisocoumarin glucoside, anti-insect, from *Aloe* 1163
diterpene quinoides, from *Tripterygium* 731
diterpenes, antiviral, from *Salvia* 539
flavonoids, cytotoxic, from *Melicope* leaves 271
lignans, insect growth-inhibitory, from *Magnolia* 611
neolignans, insect growth-inhibitory, from *Machilus* 607
3-nitropropanoic acid esters, toxic, from *Corynocarpus* 901
phytotoxin,
growth-inhibitory, from *Alternaria* 603
phytoalexin-inducing, from *Phytophthora* 307
produced by *Alternaria* on *Centaurea* 101
polysaccharides, anti-complementary, from *Artemisia* leaves 73
procyanidin oligomers, protein kinase inhibiting, from *Pseudotsuga* 1399
protein-lipopolysaccharide complex, phytotoxic, from *Verticillium* 1499
pyridine nucleotide, toxic, from *Clitocybe* 897
saponins, molluscicidal, in *Phytolacca* berries, variations in 95
sesquiterpenoid, ant-repellent, from *Dysoxylum* 1455
steroidal saponins, cardioactive, from *Tribulus* 1527
Biosynthesis,
of anatoxin-*a*, by *Anabaena* 1195
of C_{50} carotenoid, in *Corynebacterium* 933
of catalpol, in *Scutellaria* and *Paulownia* 1187
of coronatine, in *Pseudomonas* 343
of cytokinin, in *Zea* extracts 339
of fatty acids, polyunsaturated, in *Phaeodactylum* 1177
of ω-feruloyloxypalmitic acid, in potato discs 1419
of *p*-hydroxyphenylbutan-2-one, in raspberry 623
of indole-3-acetic acid, in *Zea* 905
of indole-diterpenoid mycotoxins, in *Penicillium* 921
of iridoid glycosides 621, 1187
of neurotoxin, in *Lathyrus* pods 911
of phospholipids, in soybean microsomes 1171
of sesquiterpenes, cadinane, in *Heteroscyphus* 915
of terpenoids, in elicitor-treated *Tabernaemontana* cultures, redirection of 1183
of tropic acid, in *Datura* 935
of ursolic acid, in *Perilla* cell cultures 121
of withanolides, in *Acnistus* 927
Biotransformation,
of acetophenones, with immobilized cells of carrot, tobacco and *Gardenia* 661
of (+)-camphor, by *Eucalyptus* cell cultures 941
of caryophyllene oxide, by *Eucalyptus* cultures 635
of 1,8-cineole, by *Eucalyptus* cultures 641
of (+)-epimagnolin A, by *Aspergillus* 1191
of germacrone, by suspension cultured cells 1215
of hecogenins, by *Cunninghamella* 125
of (−)- and (+)-neomenthols and isomenthol, by *Aspergillus* 1465
of solasodine, by *Cunninghamella* 125
of terpenoid indole alkaloid, capacity of, by *Tabernaemontana* 671
Bletilla striata, bibenzyl synthase catalyzing phytoalexin biosynthesis in 63
Boraginaceae 1027
Boreava orientalis, sinapic acid ester from 1481
Botrytis cinerea, selective inhibition of laccase formation in, by cucurbitacin 1137
Brassica, effect of jasmonates on indole glucosinolates in 301
Bruguiera gymnorrhiza, proanthocyanidin 3-*O*-glycosides from bark of 217
Brunsvigia josephinae, alkaloids from 809
Buddleja albiflora, iridoid biosynthesis in 621
Buddlejaceae 621
Bulbine, anthraquinone from bulbs of 685
Butanolide, from *Virola* 1469
Buxaceae 993
Buxus papillosa, non-nitrogenous triterpenoids from 993

C
Caffeic acid, oxidation of, in acidic conditions 499
Calmodulin, effect of, on cyclic nucleotide phosphodiesterase from *Lemna* 857
Calophyllum inophyllum, xanthones from root bark of 527
C. tomentosum, hydroxychromene from 507
Campanulaceae 365
(+)-Camphor, biotransformation of, in *Eucalyptus* cell cultures 941
Caprifoliaceae 1005, 1215, 1369
Caralluma umbellata, pregnane glycosides from 1549
Cardenolide,
from *Anodendron* 1077
from *Crotalaria* seeds 1375
Caruca papaya, preparation of polyethylene glycol derivative of papain from 1413
Caricaceae 1413
Carotenoid, C_{30} bacterial, stereochemistry of cyclization of 931
Caryophyllaceae 751
Caryophyllene oxide biotransformation, by *Eucalyptus* cell cultures 635
Catalpol, biosynthesis of, in *Scutellaria* and *Paulownia* 1187
Catechins,
from *Phyllocladus*, *Pseudotsuga* and *Acacia*, protein kinase inhibition by 1399
phenylpropanoid-, from *Ocotea* bark 545
Catharanthus roseus, ajmalicine metabolism in cell cultures of 677
Celastraceae 187, 731, 803, 1267
Cell wall composition, of grape skins 1241
Cellulose, in germinating seedlings, alterations in $\delta^{13}C$ values of, associated with respiration 877
Centaurea hermannii, sesquiterpene lactones from 435
C. maculosa, phytotoxin produced by *Alternaria* on 101
C. sphaerocephala, sesquiterpene lactones from 1371
Centaurium, xanthones in cell cultures of 1227
Cephaelis ipecacuanha, influence of precursors on isoquinoline alkaloid production in 947
Cephalaria transsylvanica, acidic triterpene glycoside from 1075
Ceratostigma minus, naphthoquinones from 1023
Cerulenin, interaction of, with 6-hydroxymellein synthase in carrot 297
Chemotaxonomic studies,
in Myoporaceae 7
of alkaloids,
in *Genista* 421
indole, in *Leuconotis* 169
piperidine, in *Picea* and *Pinus* 951
purine, in *Herrania* and *Theobroma* 1237
of alkenones, in *Isochrysis* 1233
of anthocyanins, in *Pharbitis* 407
of anthraquinones,
in *Aloe* roots 401
in *Bulbine* bulbs 685
of essential polyunsaturated fatty acids, in diatoms 155
of ferredoxin amino acid sequences, in *Datura* 385
of flavonoids,
in flowers of *Pharbitis* cultivars 687
in *Rosa* hybrids 413
lipophilic and vacuolar, in *Vellozia* 1475
of RUBISCO subunit polypeptide composition, in *Lepidium* 683
of sterols,
in *Isochrysis* 1233
in *Solanum* oil seeds 163
of ureases, in Cucurbitaceae 151
of waxes, epicuticular, in *Sedum* 389
Chenopodiaceae 43, 553, 1205
Chenopodium album, improved vesicular affinity sorbent from cell walls of 1205
Chlamydomonas eugametos, dephosphorylation pathway of D-*myo*-inositol 1,4,5-triphosphate in 349
Chlorella protothecoides, chlorophyll catabolism in 1387
Chlorophyll catabolism, in *Chlorella* 1387
Chlorophyta 55, 349, 1387
Chromolaena odorata, pyrrolizidine alkaloids from 615
Chromone glucosides, from *Cnidium* 221
Chrysophyta 155, 1177, 1233
1,8-Cineole biotransformation, by *Eucalyptus* cell cultures 641
Cinnamyl glucosides, from *Populus* 547
Cistaceae 713, 979
Cistus creticus, diterpene esters of malonic acid from resin of 979
Clitidine 5′-mononucleotide, from *Clitocybe* 897
Clitocybe acromelalga, toxic puridine nucleotide from 897
Cnidium japonicum, chromone glucosides from 221
Cobalamin-dependent methionine synthase, in *Euglena* 59
Compositae 73, 101, 145, 173, 191, 195, 237, 241, 269, 435, 443, 615, 629, 721, 847, 869, 1037, 1080, 1215, 1371, 1425, 1505, 1583, 1585, 1588
Convolvulaceae 407, 687
Conyza trihecatactis, diterpenoids from 195
Copaifera, furanoid clerodane diterpene from 537
Cordia corymbosa, meroterpenoid naphthoquinones from 1027
Coronamic acid, as intermediate in *Pseudomonas* coronatine biosynthesis 343
Coronatine biosynthesis, in *Pseudomonas* 343
Corynebacterium poinsettiae, stereochemistry of cyclization of C_{30} carotenoid from 931
Corynocarpaceae 901
Corynocarpus laevigatus, 3-nitropropanoic acid-glucose esters from fruit of 901
Cotoneaster thymaefolia, flavonoid glycosides from 1381
Coumarin glycosides, from *Peucedanum* 1339
Coumestan, from *Erythrina* 521
Crassulaceae 389
Crepis crocea, guaianolides from 269
Crocosmia masoniorum, acylated triterpenoid saponins from corms of 757
Crotalaria juncea, cardenolide from seeds of 1375
Cruciferae 287, 301, 683, 1481
Cryptomeria japonica, abietanes and kauranes from 1279
Cucumis sativus, hydroxy fatty acids from cutin of 818
Cucurbitaceae 151, 583, 818, 877, 1125
ureases from 151
Cucurbitacin, selective inhibition of laccase formation in *Botrytis* by 1137
Cunninghamella elegans, transformations of solasodine and hecogenins by 125
Cupressaceae 983, 1059
Curculigo recurvata, norlignan glucosides from 1343
Cyclic AMP, involvement of, in hypersensitive response of *Medicago* to fungal elicitor 889
Cyclic nucleotide phosphodiesterase, from *Lemna*, effect of calmodulin and theophylline on 857
Cyclopiazonic acid, from groundnut cake 817
Cynodon dactylon, pyrolysis MS and GC-MS of ether-linked phenolic acids in cell walls of 1143
Cytokinin biosynthesis, by *Zea* extracts 339
Cytotoxic flavonoids, from *Melicope* leaves 271

D
Dacrydium cupressinum, structure and stereochemistry of 9-epi-β-caryophyllene from 1489
Datura, identical amino acid sequence of ferredoxins in species of 385
D. stramonium, rearrangement of phenyllactate in tropic acid biosynthesis in 935

Daucus carota,
acetophenone biotransformation by immobilized cells of 661
elicitor induction of 6-methoxymellein production in 1457
interaction between cerulenin and 6-hydroxymellein synthase in 297
Dendranthema grandiflora, floral flavonoids and pelargonidin biosynthesis in 145
Dianthus chinensis, triterpenoid saponins from 751
Dibenzo-α-pyrones, from *Alternaria* 665
Diflufenican, inhibition of fatty acid synthase by 587
Dihydroflavonol, from *Plumbago* 1083
Dihydroflavonol 7-glucosides, from *Picea* needles 550
Dihydroisocoumarin glucoside, from *Aloe* 1163
Dioncophyllaceae 1461
Diosgenin, glycosylation of, by soluble glycosyltransferases from *Solanum* 1429
Diospyros peregrina, lupane triterpene from fruits of 1070
Diplophyllum serrulatum, drimane sesquiterpenoids from 1263
Dipsacaceae 1075
Dipterocarpaceae 1073
Dipteryx lacunifera, fatty acids and terpenoids from 1499
Diterpenoid
dimer, *ent*-kaurane, from *Rabdosia* 725
glycodes, from *Conyza* 195
glycosyl esters, from *Phlomis* roots 439
Diterpenoids,
abietane,
from *Cryptomeria* leaves 1279
from *Juniperus* 983
antiviral, from *Salvia* 539
clerodane, furanoid, from Copaiba oil 537
ent-*neo*-clerodane, from *Gymnosperma* 1505
neo-clerodane,
from *Baccharis* 443
from *Gymnosperma* 721
from *Salvia* 447
from *Scutellaria* 1285
dehydroabietane, from *Nepeta* 1509
esterified with malonic acid, from *Cistus* resin 979
from *Conyza* 195
from *Dipteryx* seeds 1499
from *Salvia* 1373
kaurane, from *Cryptomeria* leaves 1279
ent-kaurene, from *Rabdosia* 1513
seco-*ent*-kaurene, from *Rabdosia* 820, 1275, 1289
labdane, from *Halimium* 713
ent-labdane, from *Gymnosperma* 721
phenanthrofuran, from *Euphorbia* 1061
quinoid, interleukin-1 inhibiting, from *Tripterygium* 731
secoclerodane, from *Salvia* 1063
secolabdanoid, from *Pallavicinia* 822
Drimys winteri, drimane sesquiterpene from 975
Drynaria propinqua, flavanol glycoside from 1595
Dysoxylum lenticellare, alkaloids from 1361
D. spectabile, ant-repellent sesquiterpenoid from 1455

E
Ebenaceae 1070
Ecdysteroid production rate, in *Pteridium* cell cultures 651
Elaeis guineensis, solid-state NMR study of leaf cell walls of 485
Ellagitannin, from *Tamarix* galls 1349
Enzymes,
acid phosphatase, from *Neurospora* 1131
cyclic nucleotide phosphodiesterase, from *Lemna* 857
β-glucosidases, from *Phyllocladus*, *Pseudotsuga* and *Acacia* 1399
glycosyltransferases, soluble, from *Solanum* 1429
invertase, from potato tubers, processing of 579
isoperoxidases, from Korean radish root 287
long-chain aldehyde-forming, in *Ulva* 55
pectinesterase, from tomato 863
peroxidases, in abscission zone of bean leaves 567
protease,
from bead tree fruit sarcocarp 1395
from maize pollen 853
from *Trichosanthes* sarcocarp 583
protein kinases,
calcium- and phospholipid-dependent, from soybean 1407
inhibition of by catechins 1399
synthase, 6-hydroxymellein, from carrot cells 297
synthetase, 10-formyltetrahydrofolate, from pea cotyledons 291
transferases,
cis-prenyl, immunoinhibition of in *Ficus* and *Parthenium* 1425
from wound-healing potato tuber discs 1419
tyrosinase, low-isoelectric point, from *Agaricus* 573
UDP-glucose:flavonoid *O*-glucosyltransferase, from strawberry fruits 1435
ureases, from Cucurbitaceae 151
9-Epi-β-caryophyllene, from *Dacrydium* 1489
(+)-Epimagnolin, microbial oxidation of by *Aspergillus* 1191
Erythrina senegalensis,
epoxyisoflavones from 1573
isoflavones from 245
E. sigmoidea, isoflavanone and coumestan from 521
Essential oil, from *Satureja*, yield and composition variations in 83
Eucalyptus perriniana,
biotransformation of (+)-camphor in cell cultures of 941
caryophyllene oxide biotransformation by cell cultures of 635
1,8-cineole biotransformation by cell cultures of 641
Euglena gracilis z, subcellular distribution of cobalamin-dependent methionine synthase in 59
Euglenophyta 59
Euonymus nanus, sesquiterpene esters from 1267
Euphorbia acaulis, phenanthrofuran diterpene from 1061
Euphorbiaceae 1061, 1205, 1391
Eurycoma longifolia, canthin-6-one alkaloids from 799

F
Fabiana imbricata, sesquiterpenes from 425
Fagaceae 79, 473
Fatty acid
enone ethers, from *Hibiscus* 1245
synthase, inhibition of, by diflufenican 587
Fatty acids,
from *Dipteryx* seeds 1499
hydroxylated, from cucumber cutin 818
polyunsaturated,
biosynthesis of in *Phaeodactylum* 1177
from diatoms 155
Fatty ester, long-chain, from *Artocarpus* 781
Ferredoxins, in *Datura* species, identical amino acid sequence of 385
Ferula, sesquiterpene coumarin ethers from gum resin of 183
ω-Feruloyloxypalmitic acid, enzymic biosynthesis of, in potato discs 1419
Festuca argentina, lignans and stilbene from 479
F. versuta, resveratrol from 335
Ficus elastica, immunoinhibition of rubber particle-bound *cis*-prenyl transferases in 1425
Flavan glycosides, from *Quercus* bark 473
Flavanol glycoside, from *Drynaria* 1595
Flavanones, from *Sophora* roots 785

Flavidinin, from *Acampae*, revised structure of 273
Flavone *C*-glycoside-*O*-glycoside, from *Galipea* 1593
Flavonoid
diversity and metabolism, in *Rosa* cultivars 413
glycosides,
from *Cotoneaster* 1381
from *Indigofera* 275
Flavonoids,
cytotoxic, from *Melicope* leaves 271
floral, from *Dendranthema* cultivars 145
from *Artocarpus* 781
from *Leptospermum* 765
from *Pharbitis* acyanic flowers 687
from *Scutellaria* 511
isoprenoid-substituted, from *Glycyrrhiza* 515
lipophilic and vacuolar, from *Vellozia* 1475
3′-phenyl-, from *Hypnum* 795
sulphated, from *Polygonum*, antioxidant activity of 885
Flavonol glycosides, from *Pyrus* 1378
Flavonols, methylated, from *Jasonia* 241
Fontanesia phillyreoides, secoiridoids from 705
10-Formyltetrahydrofolate synthetase, from *Pisum* 291
Fossombronia, triterpenes from 1293
Fragaria × *ananassa*, UDP-glucose:flavonoid *O*-glucosyltransferase from 1435
Fraxinus malacophylla, secoiridoid glucosides from 177
Fucoidan fraction, low molecular weight, from *Pelvetia* 697
Fungi 101, 125, 267, 307, 321, 573, 591, 597, 603, 665, 817, 825, 835, 897, 921, 955, 1049, 1131, 1137, 1191, 1305, 1449, 1465, 1523

G
Galipea trifoliata, *O*-glycosyl-*C*-glycosylflavones from 1593
Ganoderma applanatum, lanostanoid triterpenes from 1305
Garcinia subelliptica, xanthones from root bark of 1355
Gardenia jasminoides, acetophenone biotransformation by immobilized cells of 661
Genista cinerea, ester alkaloids from 421
Gentianaceae 1227
Germacrone biotransformation, by suspension cultured cells 1215
Gibberellin *O*-glucosides, from *Phaseolus* seeds 35
Gibberellins, from *Prunus* developing fruits 1383
Glucose monophosphate metabolism, by leucoplasts and amyloplasts from soybean cultures 881
β-Glucosidases, from *Manihot*, *Passiflora* and *Prunus* 1391
Glucosinolates, indole, effect of jasmonates on 301
Glutamic acid, in barley hybrids, in relation to aphid resistance 601
Glycine max,
calcium- and phospholipid-dependent protein kinase from 1407
glucose monophosphate metabolism by leucoplasts and amyloplasts from 881
phospholipid biosynthesis in microsomes of 1171
Glycosyltransferases, from *Solanum*, glycosylation of diosgenin and solasodine by 1429
Glycyrrhiza eurycarpa, isoprenoid-substituted flavonoids from 515
Gochnatia glutinosa, farnesane sesquiterpene lactones from 1585
Gracilaria longa, R-phycoerythrin from 693
Gramineae 49, 313, 317, 335, 361, 479, 561, 601, 769, 827, 853, 873, 877, 905, 1111, 1143
widespread occurrence of resveratrol in 335
Gravity, effect of, on senescence and polyamine content of *Helianthus* cotyledons 869
Guttiferae 469, 507, 527, 1355
Gymnosperma glutinosum, diterpenes from 721, 1505

H
Halimium viscosum, labdanes from 713
Haplophyllum telephioides, alkaloid and lignans from 1600
Harrisonia brownii, rearranged limonoids from 451
Heavy metal toxicity, to *Sesamum* seedlings 1153, 1157
Hecogenin, transformation of, by *Cunninghamella* 125
Helianthus annuus,
effect of gravity on senescence and polyamine content of 869
influence of CO_2 on ACC oxidase activity in roots of 847
malonylated anthocyanins from seeds of 237
Hemerocallis longituba, amino acid amides from 1057
Hemidesmus indicus, pregnane glycosides from 1545
Hepaticae 139, 233, 822, 915, 1263, 1293, 1555
Herrania, purine alkaloid distribution in 1237
Heteroscyphus planus, biosynthesis of cadinane sesquiterpenes in 915
Hibiscus rosa-sinensis, fatty acid enone ethers from 1245
Hordeum,
effect of aphid infestation on enzyme activities in 313
metabolic changes in, at different aphid infestation levels 317
H. vulgare,
inhibition of jasmonate-induced protein synthesis in 49
non-correlation of glutamic acid content and aphid resistance in 601
Hydrocotyle ranunculoides, polyoxygenated oleanane triterpenes from 201
Hydroxamic acids, in corn, effects of on electron transport 873
Hydroxychromene, from *Calophyllum* 507
(−)-(3*R*)-5-Hydroxymellein, from *Septoria* 825
6-Hydroxymellein synthase, from carrot, binding of cerulenin to 297
p-Hydroxyphenylbutan-2-one biosynthesis, in *Rubus* 623
Hydroxyproline, in *Phytophthora* cell walls 591
Hyoscyamus albus,
accumulation of stress metabolites in 371
tropane alkaloid patterns in 107
Hypericum japonicum, phloroglucinols from 469
Hypnum cupressiforme, biflavonoids and 3′-phenylflavonoids from 795
Hypoxidaceae 1343

I
Indigofera hebepetala, flavonoid glycosides from 275
Indole, as indole-3-acetic acid precursor, in *Zea* 905
D-*myo*-Inositol 1,4,5-triphosphate, dephosphorylation pathway of, in *Chlamydomonas* 349
Insect growth-inhibitory
lignans, from *Magnolia* 611
neolignans, from *Machilus* 607
Invertase, from potato tubers, processing of 579
Ionol glycosides, from *Alangium* leaves 1331
Iridaceae 757
Iridoid glucosides,
biosynthesis of, in *Scutellaria* and *Paulownia* 1187
from *Plantago* 1367
from *Thunbergia* 1259
from *Viburnum* 1369
in *Scrophularia*, early stages of biosynthesis of 621
Iridoids, from *Rauwolfia* 1485
Isochrysis, sterols and alkenones from 1233
Isocoumarins, from *Ononis* 493
Isoeleutherol, from *Aloe* roots 401
Isoflavan, from *Millettia* 1597
Isoflavanone, from *Erythrina* 521
Isoflavanone dimers, from *Ouratea* 1567
Isoflavones, from *Erythrina* 245, 1573
Isoperoxidases, from Korean radish root 287
Ixeris dentata, sesquiterpene lactone from 1583

J
Jasmonates, potent effect of, on indole glucosinolates in Cruciferae 301
Jasonia candicans, methylated flavonols from 241
Juncaceae 1017
Juncus effusus, cycloartane triterpenes from 1017
Juniperus chinensis, abietane diterpenes from 983

L
Labiatae 83, 121, 439, 447, 511, 539, 645, 725, 820, 1063, 1065, 1167, 1187, 1275, 1285, 1289, 1373, 1509, 1513, 1590
Laccase formation, in *Botrytis*, selective inhibition of by cucurbitacin 1137
Lanosterols, from *Phellinus* 1523
Lasiodiplodia theobromae, potato micro-tuber inducing substances from 835
Lathyrus sativus, biosynthesis of neurotoxic 3-*N*-oxalyl-L-2,3-diaminopropanoic acid in 911
Lauraceae 545, 607, 1363
Lectins,
from *Sarothamnus* seed 841
galactose-binding, from *Telfairia* seeds 1125
vesicular affinity sorbent for purification of 1205
Lecythidaceae 1315
Leguminosae 35, 245, 275, 281, 291, 421, 465, 493, 515, 521, 537, 567, 745, 785, 841, 881, 889, 911, 1171, 1309, 1375, 1399, 1407, 1499, 1559, 1573, 1597
triterpene alcohols and 3-oxo steroids from 1309
Lemna paucicostata, cyclic nucleotide phosphodiesterase from 857
Lemnaceae 857
Lepidium, subunit polypeptide composition of RUBISCO as taxonomic character in 683
Leptospermum scoparium, triterpenoids and flavonoids from 765
Leuconotis eugenifolius, indole alkaloids from 169
Lichexanthone, from *Minquartia* 1297
Lignan glucosides, from sesame seeds 773
Lignans,
from *Festuca* 479
from *Haplophyllum* 1600
insect growth-inhibitory from *Magnolia* flower buds 611
Liliaceae 1057
Limonoids,
from *Turraea* seed 455
rearranged, from *Harrisonia* 451
Linaceae 489
Lindera myrrha, aporphine alkaloids from 1363
Linum usitatissimum, determination of phenolic structures in fibre of, by solid-state NMR 489
Lipid composition, of grape leaf plasma membrane 1249
Lobelia sessilifolia, polyacetylenes in hairy roots of 365
Lonicera japonica, triterpenoid saponins from 1005
Lycopersicon esculentum, novel form of pectinesterase from 863
L. pimpinellifolium, steroidal alkaloids from 813
Lysophosphatidylcholine acyltransferase, from soya bean microsomes, molecular species formed by 1171

M
Machilus japonica, insect growth-inhibitory neolignans from 607
Maculosin, metabolism of 101
Magnolia fargesii, insect growth-inhibitory lignan from flower buds of 611
Magnoliaceae 611, 975
Malvaceae 1245, 1449
Mangifera indica, 29-hydroxymangiferonic acid from 1301
Manihot glaziovii, β-glucosidases from 1391
1,2-α-D-mannosidase, from *Aspergillus*, modification of by water-soluble carbodiimide 267
Marchantia polymorpha, phenanthrenes from cultures of 139
Maytenus boaria, sesquiterpene from 187
M. emarginata, sesquiterpene pyridine alkaloids from 803
Medicago sativa, involvement of cyclic AMP in hypersensitive response of 889
Melanin formation, in *Agaricus*, involving 4-aminophenol 597
Melia azedarach, protease from 1395
Meliaceae 455, 542, 1361, 1395, 1455
Melicope triphylla, cytotoxic flavonoids from 271
Membrane leakage, in red beet vacuoles, effects of phaseollin on 43
Menispermaceae 263
Menthols, biotransformation of, by *Aspergillus* 1465
Methionine synthase, in *Euglena*, subcellular distribution of 59
N-Methoxyseptorinol, from *Septoria*, absolute stereochemistry of 955
Millettia racemosa, isoflavan from 1597
Minquartia guianensis, triterpenes, lichexanthone and acetylenic acid from 1297
Monensin, uncoupling activities of 1105
Monimiaceae 1495
Monoterpenoids,
biotransformation of, by *Aspergillus* 1465
enantioexcess, from *Asiasarum* roots 969
Moraceae 781, 1001, 1425
Morinda citrifolia, sterol composition of cell cultures of 655
Murraya koenigii, carbazole alkaloids from 1085
Musci 795
Mycotoxins,
from groundnut cake, involved in turkey 'X' disease 817
indole-diterpenoid, biosynthetic intermediates of 921
Myoporaceae, phytochemistry of 7
Myristicaceae 1469
Myrtaceae 635, 641, 765, 941

N
Naphthalenes, from *Wettsteinia* 1555
Naphthoquinones,
from *Ceratostigma* 1023
from *Newbouldia* roots 1602
isofurano-, from *Ventilago* 1029
meroterpenoid, from *Cordia* 1027
Neocallitropsis pancheri, prezizane sesquiterpene from 1059
Neolignans,
from *Arum* 777
insect growth-inhibitory, from *Machilus* 607
Nepeta teydea, dehydroabietane diterpenes from 1509
Neurospora crassa, constitutive excretion of acid phosphatase in 1131
Neurotoxin, biosynthesis of, in developing *Lathyrus* pods 911
Newbouldia laevis,
naphthaquinones and alkaloid from 1602
pyrazole alkaloids from 1053
Nicotiana tabacum,
acetophenone biotransformation by immobilized cell cultures of 661
sterol composition of cell cultures of 655
Nitrate reductase activity, of *Sesamum* seedlings, toxicity of heavy metals to 1153
1-Nitroaknadinine, from *Stephania* 263
3-Nitropropanoic acid esters, from *Corynocarpus* fruits 901
Non-protein amino acid, neurotoxic, biosynthesis of in *Lathyrus* 911
Norlignan glucosides, from *Curculigo* 1343

O
Ochna calodendron, biflavonoids from 791
Ochnaceae 791, 1567
Ocotea porosa, phenylpropanoid-catechins from bark of 545
Octacosanyl hexadecanoate, from *Pleurospermum* 1033
Olacaceae 1297
Olea europaea, C_6-C_2 phenolic from fruits of 1335
Oleaceae 177, 705, 1335
Oligogalacturonides, in *Rosa* cells, absence of transglycosylation with 67
Ononis pubescens, alkylresorcinols and isocoumarins from 493
Orchidaceae 63, 135, 205, 273
Oryza sativa,
alkyl resorcinols from root exudates of 769
polysaccharides in primary cell walls of 361
Ouratea hexasperma, isoflavanone dimers from 1567
Ozone, effect of, on Scots pine biochemistry and aphid infestation 39

P
Pallavicinia subciliata, secolabdanoid diterpene from 822
Palmae 485
Panax ginseng, linoleoylated polyacetylenes from roots of 963
P. quinquefolium,
polyacetylenes from 1255
saponin production in callus and cell cultures of 1221
Papain, preparation of polyethylene glycol derivative of 1413
Papaveraceae 353
Parthenium argentatum, immunoinhibition of rubber particle-bound *cis*-prenyl transferases in 1425
Passiflora foetida, β-glucosidases from 1391
Passifloraceae 1391
Paulownia tomentosa, catalpol biosynthesis in 1187
Pectinesterase, from tomato 863
Pedaliaceae 773, 1153, 1157
Pelvetia canaliculata, low molecular weight fucoidan fraction from 697
Penicillium, incorporation of 10β-hydroxypaxilline in indole-diterpenoids from 921
Pentagramma triangularis, biflavonoids from farinose exudate of 1043
Perilla frutescens, ursolic acid biosynthesis in 121
Peroxidases, in separation zone during ethylene-induced bean leaf abscission 567
Petromyces alliaceus, bicoumarins from 1049
Peucedanum japonicum, coumarin glycosides from 1339
Peucephyllum schottii, sesquiterpene lactones from 191
Phaeodactylum tricornutum, polyunsaturated fatty acid biosynthesis in 1177
Phaeophyta 697
Phallus impudicus, dimethyl oligosulphides from 321
Pharbitis nil,
acylated anthocyanins from maroon flowers of 407
flavonoids in acyanic flowers of 687
Phaseollin, effects of, on membrane leakage in red beet 43
Phaseolus coccineus, gibberellin *O*-glucosides from mature seeds of 35
P. vulgaris, peroxidases in leaf abscission zone 567
Phellinus torulosus, lanosterols from 1523
Phellodendron amurense, phenolics from bark of 209
Phenanthrenes, from *Marchantia* cultures 139
Phenolic acids, in *Cynodon* cell walls, pyrolysis GC-MS of 1143
Phenolics,
C_6-C_2, from *Olea* fruits 1335
from *Phellodendron* bark 209
from rooibos tea 1559
in flax fibre, structure determination of by solid-state NMR 489
Phenyllactate, rearrangement of, in tropic acid biosynthesis in *Datura* 935
Phenylpropanoid-catechins, from *Ocotea* bark 545
Phenylpropanoids, from *Baccharis* 1037
Phenylureas, uncoupling properties of 553
Phlomis, diterpenoid glycosyl esters from 439
Phloroglucinols, from *Hypericum* 469
Phospholipid biosynthesis, in soybean microsomes 1171
R-Phycoerythrin, from *Gracilaria* 693
Phyllocladus trichomanoides, protein kinase inhibition by catechins from 1399
Phytoalexins,
biosynthesis of, in orchids, bibenzyl synthase involved in 63
from *Sanguisorba* roots 331
production of, elicitor induced, in carrot cell cultures 1457
Phytolacca dodecandra, variation in molluscicidal saponin content of berries from 95
Phytolaccaceae 95
Phytophthora cactorum, phytotoxin from 307
P. parasitica, hydroxyproline in cell walls of 591
Phytotoxin,
from *Alternaria* 101, 603
from *Phytophthora* 307
Picea, piperidine alkaloid content of 951
P. abies, dihydroflavonol 7-glucosides from 550
P. jezoensis, 3-oxo-serratene triterpenoids from 1517
Picrodendron baccatum, picrotoxane terpenoids from 701
Pilocarpus spicatus, dammarane triterpenes from 739
Pinaceae 39, 550, 951, 1271, 1399, 1517
Pinus, piperidine alkaloid content of 951
P. sylvestris, effect of ozone on biochemistry and aphid infestation of 39
Pisum sativum, 10-formyltetrahydrofolate synthetase from 291
Plantaginaceae 1367
Plantago hookeriana, iridoid glucosides from 1367
Pleurospermum densiflorum, octacosanyl hexadecanoate from 1033
Plumbaginaceae 1023, 1083
Plumbago indica, dihydroflavonol from 1083
Podocarpaceae 1399, 1489
Polyacetylenes,
from *Panax* 1255
in *Lobelia* hairy roots 365
linoleoylated, from *Panax* roots 963
Polyamine content, of *Helianthus* cotyledons, effect of gravity on 869
Polyglutamate substrates, affinity of 10-formyltetrahydrofolate synthetase for 291
Polygonaceae 885, 1215
Polygonum hydropiper, antioxidative sulphated flavonoids from 885
Polysaccharides,
anti-complementary, from *Artemisia* leaves 73
in rice primary cell walls 361
in *Rosa* cell suspensions 67
of cell walls, ^{1}H NMR measurement of *O*-acetyl groups of 959
Populus tremula, cinnamylglycosides from 547
Pregnane glycosides,
from *Caralluma* 1549
from *Hemidesmus* 1545
cis-Prenyl transferases, rubber particle-bound, immunoinhibition of 1425
Proanthocyanidins, with catechin 3-*O*-rhamnoside chain extender units, from *Bruguiera* bark 217
Procyanidin
glycosides, from *Quercus* bark 473
oligomers, protein kinase inhibition by 1399
Prosopis chilensis, cell wall proteins in seedling cotyledons of 281

Protease,
from *Melia* sarcocarp 1395
from *Trichosanthes* sarcocarp 583
Protease activity, from maize pollen 853
Protein kinase, calcium- and phospholipid-dependent, from soybean 1407
Protein kinase inhibition, by catechins and procyanidins 1399
Protein-lipopolysaccharide complex, phytotoxic, produced by *Verticillium* 1449
Proteins, in *Prosopis* seedling cotyledon cell walls 281
Prunus avium, gibberellins from fruitlets of 1383
P. polystachya, β-glucosidases from 1391
Pseudomonas syringae, coronamic acid as intermediate in coronatine biosynthesis in 343
Pseudotsuga menziesii, protein kinase inhibition by procyanidin oligomers from 1399
Pteridium aquilinum, ecdysteroid production rate in cell cultures of 651
Pteridophyta 651, 1043, 1595
Pyridine nucleotide, toxic, from *Clitocybe* 897
α-Pyrone, from *Syncolostemon* 1590
Pyrus bourgaeana, flavonol glycosides from 1378

Q

Quassia indica, quassinoids from 459
Quassinoids, from *Quassia* 459
Quercus marilandica, flavan and procyanidin glycosides from bark of 473
Q. robur, isomeric alkyl esters in leaf cuticular wax from 79

R

Rabdosia eriocalyx,
ent-kaurane diterpenoid from 820
symmetric *ent*-kaurane dimer from 725
R. longituba, 6,7-*seco*-*ent*-kaurenoids from 1275
R. shikokiana, 8,9-*seco*-*ent*-kaurenoids from 1289
R. ternifolia, diterpenoids from 1513
Ranunculaceae 829
Raphanus sativus, isoperoxidases from roots of 287
Rauwolfia grandiflora, iridoids from 1465
R. serpentina, alkaloid synthesis by transformed root cultures of 381
Resonance Raman spectroscopy, of anthocyanins and anthocyanidins 227
Resorcinols, alkylated, from rice root exudates 769
Resveratrol, widespread occurrence of, in Poaceae 335
Rhamnaceae 1029, 1579
Rhizophoraceae 217
Rhodophyta 693
Ricciocarpos natans, anthocyanidins from cell walls of 233
Rosa, absence of transglycosylation with oligogalacturonides in 67
R. × *hybrida*, flavonoid diversity and metabolism in cultivars of 413
R. rugosa, sesquiterpenoids from glandular trichome exudates of 325
Rosaceae 67, 325, 331, 413, 623, 1378, 1381, 1383, 1391, 1435
Rubiaceae 655, 661, 947
RUBISCO, subunit polypeptide composition of, as taxonomic character in *Lepidium* 683
Rubus idaeus, *p*-hydroxyphenylbutan-2-one biosynthesis in 623
Rutaceae 209, 271, 739, 1085, 1593, 1600

S

Salicaceae 547
Salvia columbariae, diterpenes from 1373
S. madrensis, *neo*-clerodane diterpenoids from 447
S. nemorosa, terpenoids from 1065
S. officinalis, antiviral diterpenes from 539
S. patens, blue pigment complex in flowers of 1167
S. rhyacophila, secoclerodane diterpene from 1063
Sanguisorba minor, phytoalexin from roots of 331
Saponin production, in *Panax* callus and cell cultures 1221
Saponins,
molluscicidal, from *Phytolacca* berries, variations in 95
steroidal, cardioactive, from *Tribulus* 1527
triterpenoid,
acylated, from *Crocosmia* corms 757
from *Aralia* 1319
from *Barringtonia* 1315
from *Dianthus* 751
from *Lonicera* 1005
from *Sideroxylon* 1013
from *Verbascum* 1009
Sapotaceae 1013
Sarothamnus welwitschii, lectin from seed of 841
Satureja obovata, yield and composition variations in essential oil from 83
Sauromatum guttatum, dimethyl oligosulphides from 321
Schefflera lucantha, triterpenoid glycosides from 987
Schisandra sphenanthera, triterpenoids from 1068
Schisandraceae 1068
Scrophularia umbrosa, early stages in biosynthesis of iridoid glucosides in 621
Scrophulariaceae 621, 1009
Scutellaria albida, catalpol biosynthesis in 1187
S. alpina, *neo*-clerodane diterpenoids from 1285
S. baicalensis, flavonoids from 511
Secale cereale, benzoxazinone from 827
Secoiridoid glucosides, from *Fraxinus* 177
Secoiridoids, from *Fontanesia* 705
Sedum, epicuticular wax composition of 389
Senescence, of *Helianthus* cotyledons, effect of gravity on 869
Senna multiglandulosa, anthraquinones from 465
Septoria nodorum,
absolute stereochemistry of *N*-methoxyseptorinol from 955
(−)-(3*R*)-hydroxymellein from 825
Sequestration, of pyrrolizidine alkaloids in *Zonocerus* grasshopper 615
Sesamum indicum,
heavy metal toxicity to seedlings of 1153, 1157
sesasminol glucosides from seeds of 773
Sesquiterpene coumarin ethers, from Asafetida 183
Sesquiterpene lactones,
farnesane, from *Gochnatia* 1585
from *Centaurea* 435, 1371
from *Ixeris* 1583
from *Peucephyllum* 191
from *Xanthium* 1080
guaianolides, from *Crepis* 269
Sesquiterpenoid esters, from *Euonymus* 1267
Sesquiterpenoids,
ant-repellent, from *Dysoxylum* 1455
biotransformation of, by suspension cultured cells 1215
cadinane,
biosynthesis of in *Heteroscyphus* cell cultures 915
from *Siparuna* 1495
drimane,
from *Diplophyllum* 1263
from *Drimys* 975
from *Dipteryx* seeds 1499
from *Fabiana* 425
from *Maytenus* 187
from *Rosa* glandular trichome exudates 325
prezizane, from *Neocallitropsis* 1059
Shorea robusta, triterpenoids from resin of 1073
Sideritis foetens, biologically active triterpenes from micropropagated plants of 645
Sideroxylon cubense, triterpenoid saponins from 1013
Simaroubaceae 451, 459, 701, 799

Sinapic acid ester, from *Boreava* 1481
Sinapis, effect of jasmonates on indole glucosinolates in 301
Siparuna macrotepala, cadinane sesquiterpenes from 1495
Solanaceae 107, 163, 371, 385, 425, 553, 579, 655, 661, 813, 835, 863, 927, 935, 1419, 1429, 1441
Solanum, sterols in oil seeds of 163
S. melongena, glycosylation of diosgenin and solasodine by soluble glycosyltransferases from 1429
S. tuberosum,
induction of micro-tubers in, by *Lasiodiplodia* metabolites 835
processing of a 58×10^3 *M*, invertase from 579
sterol composition of cell culture of 655
transferase involved in biosynthesis of alkyl ferulates from 1419
Solasodine,
glycosylation of, by soluble glycosyltransferases from *Solanum* 1429
transformation of, by *Cunninghamella* 125
Solid-state NMR study,
of oil palm leaf cell walls 485
of phenolics in flax fibre 489
Sophora exigua, prenylated flavanones and benzochromone from roots of 785
Spirostans, transformation of, by *Cunninghamella* 125
Spodoptera frugiperda, heterologous expression of plant enzymes in cell culture of 353
Sporobolus stapfianus, antioxidant system in 561
Stephania sutchuensis, hasubanan alkaloid from 263
Sterculiaceae 1237
Steroids, 3-oxo, from Leguminosae seeds 1309
Sterol composition, of *Apium*, *Morinda*, *Nicotiana*, *Solanum* and *Tabernaemontana* cultures 655
Sterols,
from *Isochrysis* 1233
from *Solanum* oil seeds 163
Stilbenes,
from *Festuca* 479
occurrence of in Poaceae 335
Stilbenoids, from *Arundina* 205
Stress metabolites, accumulation of, in *Hyoscyamus* cultures 371
Strictosidine synthase, heterologous expression of, in insect cell culture 353
Strychnaceae 533
Strychnos gossweileri, indole alkaloid from 533
Sulphides, released from *Sauromatum* and *Phallus* 321
Syncolostemon densiflorus, α-pyrone from 1590

T
Tabernaemontana divaricata,
redirection of terpenoid biosynthesis of elicitor-treated cultures of 1183
sterol composition of cell cultures of 655
terpenoid indole alkaloid biotransformation capacity of cultures of 671
Tamacricaceae 1349
Tamarix aphylla, ellagitannin from galls of 1349
Taxodiaceae 1279
Telfairia occidentalis, galactose-binding T-cell mitogenic lectin from 1125
Terpenoid
biosynthesis, redirection of, in elicitor-treated *Tabernaemontana* cultures 1183
glycosides, from *Aster* roots 173
Terpenoids,
from *Abies* wood 1271
from *Salvia* 1065
picrotoxane, from *Picrodendron* 701
Theobroma, purine alkaloid distribution in 1237
Theophylline, effect of, on cyclic nucleotide phosphodiesterase from *Lemna* 857
Thunbergia alata, iridoid glucosides from 1259
Tribulus cistoides, cardioactive steroid saponins from 1527
Trichosanthes bracteata, protease from sarcocarp of 583
Triphylophyllum peltatum, antiplasmodial naphthylisoquinoline alkaloids from 1461
Tripterygium wilfordii, interleukin-1 inhibiting quinoid diterpenes from 731
Triterpene alcohols, from Leguminosae seeds 1309
Triterpenoid glycosides,
acidic, from *Cephalaria* 1075
cycloartane, from *Astragalus* 745
from *Schefflera* 987
Triterpenoids,
biologically active, from micropropagated *Sideritis* 645
biosynthesis of, in *Perilla* 121
cycloartane, from *Juncus* 1017
dammarane,
from *Astrotrichilia* 542
from *Pilocarpus* 739
from *Actinidia* callus tissue 377
from *Artocarpus* 1001
from *Fossombronia* 1293
from *Mangifera* 1301
from *Minquartia* 1297
from *Phellinus* 1523
from *Schisandra* 1068
from *Shorea* resin 1073
lanostanoid, from *Ganoderma* 1305
lupane, from *Diospyros* fruit 1070
non-nitrogenous, from *Buxus* roots 993
oleanane, from *Hydrocotyle* 201
3-oxo-serratene, from *Picea* stem bark 1517
ursene, from *Leptospermum* 765
Triticum, effect of aphid infestation on enzyme activities in 313
Tropinone reduction, in *Atropa* root cultures 1441
Turkey 'X' disease, *Aspergillus* mycotoxin associated with 817
Turraea floribunda, limonoids from seed of 455
Tyrosinases, low-isoelectric point, from *Agaricus* 573

U
UDP-glucose:flavonoid *O*-glucosyltransferase, from strawberry fruits 1435
Ulva pertusa, long-chain aldehyde-forming enzyme in 55
Umbelliferae 111, 183, 201, 221, 297, 655, 661, 1033, 1215, 1339, 1457
flower volatiles from 111
Uncouplers, non-protonophore, acting on natural and artificial membranes 553
Ureases, from Cucurbitaceae 151
Ursolic acid,
biosynthesis of, in *Perilla* cell cultures 121
inhibition of jasmonate-induced protein synthesis by 49

V
Vanilla planifolia, use of aerial roots of, for vanillin production 135
Vanillin production, use of *Vanilla* aerial roots for 135
Vellozia, lipophilic and vacuolar flavonoids from 1475
Velloziaceae 1475
Ventilago vitiensis, benzisochromanquinones and isofuranonaphthoquinone from 1029
Verbascum songaricum, triterpenoid saponin from 1009
Verticillium dahliae, phytotoxic protein–lipopolysaccharide complex produced by 1449
Viburnum suspensum, iridoid glucosides from 1369
Virola surinamensis, butanolide from 1469
Viscaceae 1205
Vitaceae 1241, 1249
Vitis vinifera,
cell wall composition of berry skins of 1241
lipid composition of plasma membrane in leaves of 1249

Volatiles,
from Apiaceae flowers 111
from *Sauromatum* and *Phallus* 321

W
Waxes, epicuticular, from *Sedum*, composition of 389
Wettsteinia schusterana, naphthalenes from 1555
Withanolides, biosynthesis of in *Acnistus* 927

X
Xanthanolides, from *Xanthium* 1588
Xanthium cavanillesii, xanthanolides from 1588
X. strumarium, sesquiterpene lactone from 1080
Xanthones,
from *Calophyllum* root bark 527
from *Centaurium* cell cultures 1227
from *Garcinia* root bark 1355
from *Minquartia* 1297

Z
Zea mays,
auxin-binding site modelling of auxin-binding protein 1 from 1111
compartmentation of DIMBOA-glucoside and β-glucosidase in 873
cytokinin biosynthesis by extracts of 339
effects of hydroxamic acids on electron transport in 873
indole as precursor of indole-3-acetic acid in 905
protease activity from pollen of 853
Ziziphus mucronata, cyclopeptide alkaloids from 1579
Zygophyllaceae 1527
